Board of Directors, Bank of Oak Ridge
Board of Directors, Medical Security Insurance Company
Past President, American Association of Endodontists
Past General Chairperson, American Dental Association

To whom it may concern:

September 23, 2020

It is a distinct honor for me to recommend Mr. Harry Boody to you and others with his innovative approach to residential energy conservation. Harry is most knowledgeable and passionate with helping homeowners as they build a home or renovate their current structure.

My wife, Frankie, and I first met Harry in 1984 with our friend and architect, Mr. Carl Myatt, AIA, when we began designing our new home. Construction was initiated in 1985, and we moved in May 1986. During the Jimmy Carter presidency, interest rates were at 21% and energy became very expensive. Therefore, we hired Harry Boody of Energy Innovations to design our Thermal Insulation & HVAC system and the coordination with our architect, Mr. Carl Myatt.

Our 8500 ft.² home is designed with passive solar features having all large windows facing directly south and proper overhangs to protect the sunlight during the summer with deciduous trees, and allowing sunlight during winter. We also have an indoor Swimming Pool and Hot Tub where Harry designed the pool system for excellent humidity control.

Harry Boody was able to coordinate his energy efficient design with the custom cutting and fitting all Insulation. Then wrapping all exterior walls and ceilings before the sheet rock with his Heat Shield Vapor Radiant barrier along with Air Sealing all spaces to outer walls around outlets, light switches, windows, and doors. And then designing an HVAC system which utilizes well water to heat and air condition our large home for only \$72 a month. Harry installed an individual electric kWh meter for our HVAC system and another electric kWh meter for the well pump. Every month I would record the energy utilization from our main house meter and the two separate meters, providing this information to Harry. Yes, only \$72 dollars a month for heating and air conditioning our 8500 ft.² home. The Energy system design has paid for itself many time over!

I had been told there would be moisture problems within my walls base on Harry's methods but I have had no humidity/mildew issues in 34 years. The building and HVAC industry still doesn't understand what Energy Innovations does. It is a science that works and they should embrace his proven technology.

Is Harry Boody knowledgeable... Absolutely; is Harry Boody honest and trustworthy... absolutely; is Harry Boody passionate about his Energy Efficient Designs... absolutely! We continue to recommend him to our many friends and colleagues.

Most sincerely,

John S. Olmsted, DDS MS
