To whom it may concern:

Please accept this letter as my reference to attest to the knowledge and experience of Mr. Harry Boody, a qualified energy consultant in HVAC and building energy conservation and efficiency. I have known and worked with Mr. Boody for just 4 years, however, I am very aware of his extensive experience, many years of service expanding 4 decades, and many of his system designs and implementations prior to our relationship and all of them since.

Specifically, I want to state that Mr. Boody follows proven scientific principles, applies them within various code and jurisdictional requirements (unlike what typically occurs in the construction world), and follows through with Quality Control to insure complete success. Mr. Boody's integrity in this process is inferior to no one.

Mr. Boody's designs, installed in homes, provides value with greatly improved air quality, improved comfort, and reduced Energy cost. Amazingly, his company, Energy Innovations by Harry Boody, Inc. issues a Lifetime Performance Guarantee for a not to exceed Energy consumption limit that is transferable to the next owner at time of resale. To date the Energy consumption guaranteed has never been exceeded. Every installation is unique, however, it will pay for itself.

My confidence in Mr. Boody is supported by the fact that I have engaged him to completely redesign and remodel the HVAC system in my personal home. My home's system was originally designed, built, and installed using standard and typical designs and it continues to perform poorly, inefficiently, and with high operating costs. I am very much looking forward to ripping it out and replacing it with Mr. Boody's design.

I would not hesitate to recommend Mr. Boody to anyone to achieve the most comfortable home with the highest energy efficiency possible.
