RE: 4500 Scotland Drive

Dear Mr. Boody,

I write you this letter to express my sincere gratitude for the services you have provided on this project and the ingenuity that seems to be unmatched by any other approach in the industry.

Your knowledge of thermal energy and your ability to convey the technical data that is associated with such complex calculations in terms that can be understood by individuals with little to no experience is overwhelming.

As you know, I was quite astonished this past winter to discover that we could heat a 15,000 sf home in its entirety with nothing more than 100,000 btu convention heater in our basement.

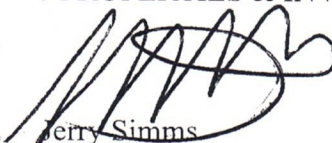

The thermal envelope that you have created and implemented on our home is clearly remarkable and will provide a lifetime of comfort for me and my family at what appears to be the most economical heating and cooling package I have ever seen.

I have had numerous meetings with building inspectors, engineers and contractors and all of them are amazed at the quality of your system and are convinced that your technology is the pinnacle of the future of HVAC systems for residential and commercial projects.

Some of the most over qualified and so-called experts in the industry cannot even begin to get their arms around the commonsensical approach of your system. It would be a great leap forward for the industry if you could somehow get your information to these professionals so that they could simply eliminate the repetitive over designing that goes on in the industry. This would save the ultimate consumer an unfathomable amount of wasted money.

Sincerely,

J PROPERTIES & INVESTMENTS

Jerry Simms
